# 63rd CIDOC CRM & 56th FRBR/LRMoo SIG Meeting

# Containers in OntoME

## A new approach to documenting and simplifying the configuration of WissKI projects.

Nuremberg - 08.10.2026

Stephen Hart, Unibe (DSL), Francesco Beretta, Unibe (DH Center)

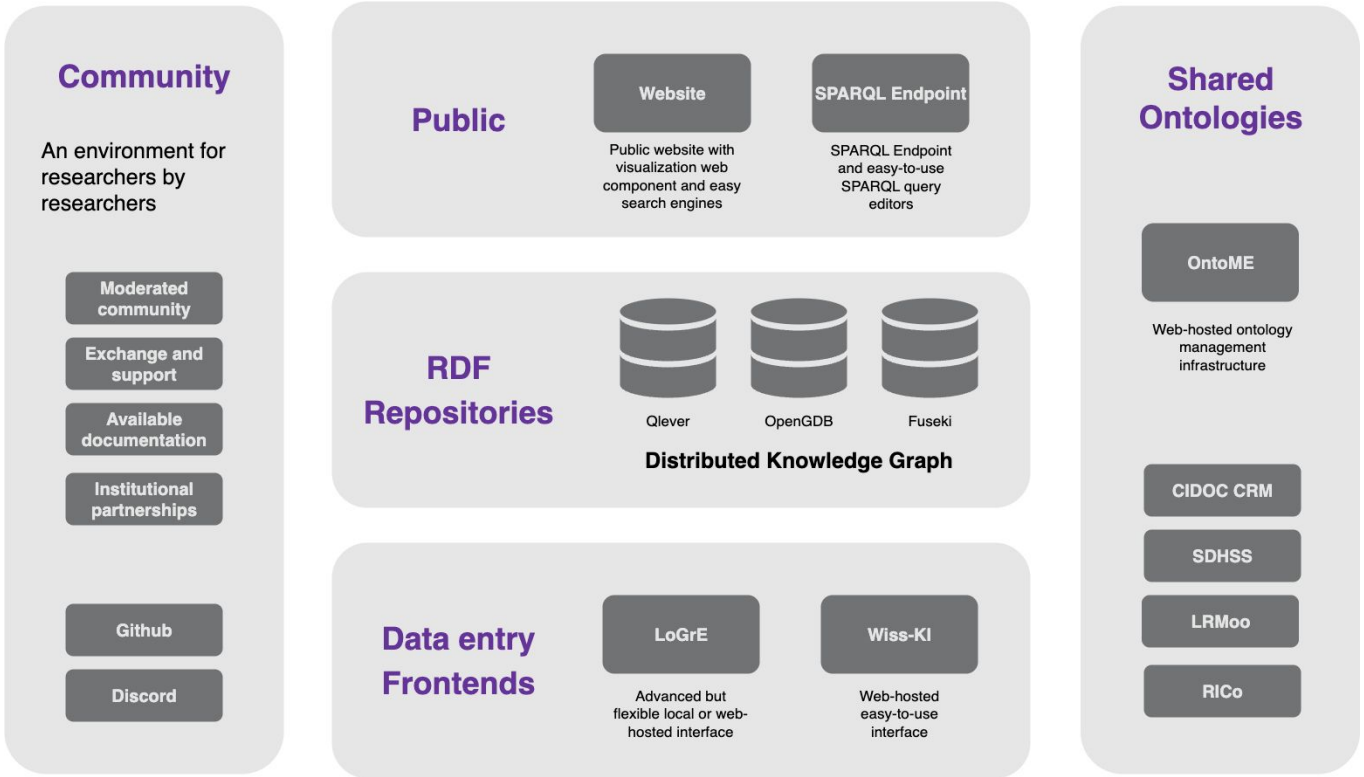
CC-BY 4.0

# Agenda

1. The LOD4HSS Context
2. OntoME and WissKI
3. Containers:
   - Namespace selection
   - Pathbuilder storage
4. Take aways and next steps

CC-BY 4.0

# The LOD4HSS Context



CC-BY 4.0

# OntoME and WissKI

Collaborative ontology and application profiles documentation platform

https://ontome.net/

Supported by the LARHRA (CNRS/ Universités de Lyon et Grenoble)

LOD production environment based on the Drupal CMS.

https://wiss-ki.eu/

Supported by the Germanisches Nationalmuseum (Nürnberg) and IGSD association

# Conclusions

Take Aways:

- Better documentation and publication of the ontologies and models
- Reuse existing configurations for new projects

Next Steps:

- Better interaction between OntoME and WissKI (APIs)
- Better documentation of Pathbuilders in OntoME
- Apply the methodology to other tools
